Mechanism of internal assessment is transparent and robust in terms of frequency and variety

The assessment of the students throughout the year is made by **Continuous Internal Evaluation system**. Our institute makes sure that Internal Assessment is transparent and robust in terms of frequency and variety. The institute follows the directives of university methods of Assessment. The assessment of students is carried out by two ways:

1) Assessment through CIE: As per the suggestions of AAA, Internal Quality Assurance Cell and the Examination committee of the Institution the faculty uses the different methods of evaluation to bring the variety in internal evaluation. Such as -

- Unit Test
- Open book test
- Surprise test
- Question paper solutions
- Oral
- Recitation Competition
- Book Review
- Quiz
- E-tests etc.

To maintain transparency the answer books are handed over to the students to know their performance in the examinations. The students' doubts are clarified if any. Students are allowed to verify their answer books. To maintain transparency the answer books of different tests are assessed and discussed with students. Guidance is given to the students whose performance is poor in the examination as well as best answer by the students is shown to other students as a good example and finally handed over to the students.

2) Assessment through University Examination:

The University has given responsibility of assessing the answer book of first year and second year students of all faculties at Institute level. However, the institute has a separate assessment center. After completion of the examination of the first- and second-year classes the examination committee hands over the answer books to the CAP Coordinator. The concerned subject teachers assess the answer books in the CAP center. After completion of the assessment obtained marks are feed in university software through online process.

The Physical Director of the college conduct physical education examination for the first-year students of all faculties in which the External examiner assess the performance of physical exercises of the students. Hence this examination is held transparently. The practical is held by the departments of Home Science and Psychology. These practical is recorded in practical journals regularly and the subject teacher's asses these journals. The external examiner evaluates the results of the practical examination held at the end of the year. Hence these practical examinations are conducted with transparently in our college. The field projects for environmental studies are undertaken by the students of 2nd year of all faculties. These projects are assessed by the concerned teacher and obtained marks are sent to the University. Similarly for the 3rd year students of all faculties' seminars, projects and oral test are conducted and the assessment of these seminars, projects and oral tests is made objectively on the basis of the performance of the students. Their marks are sent to the University.
